Driving Licence

SKILLS

Systems & Networks

- Operating systems & system programming
- OS design & implementation
- Concurrent programming
- OSI / TCP-IP networks
- LAN / intranet, VLAN administration
- Network security

Security & Cryptography

- Cryptography & algebra for crypto
- OWASP ZAP, scraping, penetration testing

Development & Software Engineering

- Software engineering, OO design
- Compilation & formal languages
- Parallel and distributed computing

Programming Languages

- C, C++, Java, Python
- ARM & MIPS Assembly
- VHDL
- Next.js (JavaScript)

AI & Data

- Machine Learning, neural networks
- LLMs

Algorithms & Mathematics

- Advanced algorithmics
- Mathematics & probability

Tools & DevOps

- Docker, virtual machines
- Cloud (AWS)
- GDB, Valgrind, advanced debugging
- Git, Shell scripting

Databases

- SQLite, PostgreSQL

LANGUAGES

- **English** : Bilingual
- **French** : Bilingual
- **Arabic** : Bilingual
- **Kabyle** : Mother tongue

SOFT SKILLS

- Teamwork
- Rigour & organisation
- Formal, punctual & personable
- Curious & proactive

INTERESTS

- Technology watch
- Padel
- Blues & Jazz

EDUCATION

ESGI Grenoble 2026 – 2028

Master's — Networks, Systems, Cloud Computing & Security
24-month work-study — seeking placement, Greater Grenoble Area

University Grenoble Alpes — UFR IM2AG 2025 – 2026

M1 General Computer Science (*in progress*)

University Grenoble Alpes 2022 – 2025

Bachelor's in General Computer Science

EXPERIENCE

Internship — Design Factory UGA & VertiT Apr. – Jul. 24, 2026

Auvergne-Rhône-Alpes

Digital sovereignty, ecological transition & migration to open source

- Audit and recommendations for migrating proprietary tools to open-source solutions (LibreOffice, Nextcloud)
- Analysis of digital sovereignty issues and carbon footprint of enterprise digital tools
- Participation in the digital ecological transition project and delivery of technical reports

Freelance — Web Developer 2024 – 2025

- Design and development of a vehicle transport management web application (Next.js / TypeScript)
- Responsive UI, user management and transport data handling

PROJECTS

Personal projects

VPN CLI — Cloud Deployment

CLI-driven VPN implementation deployed on cloud infrastructure — tunnel management, authentication and routing

Software development

Nachos Operating System (C/C++)

- Synchronized I/O console implementation
- User-level thread interface
- Paged memory management
- Multi-process management with dynamic heap allocator
- File system
- Reliable network layer (Stop-and-Wait ARQ): connection management, synchronisation

TCP/IP Messaging Application (Java)

Connection management, message exchange and synchronisation — real-time client/server architecture

ARMv5 Simulator (C)

Implementation of an ARMv5 instruction interpreter with GDB simulation

ELF Linker (C)

Symbol management, relocation tables and dynamic loading in simulated memory

Games: Onitama, Tablut, Sokoban (Java)

Complete game engine, GUI and multi-level AI (search algorithms & heuristics)

Machine Learning

Multilayer Perceptron (MLP) — Medical Classification (Python)

Training an MLP to predict patient health status — preprocessing and performance evaluation

Image Recognition with Neural Networks (Python)

MNIST classification, supervised training, visualisation and model tuning

ADDITIONAL TRAINING

AWS Cloud Practitioner Essentials — AWS Skill Builder 2025

Learning AI Through Visualization — Columbia University 2025

Cisco CCNA 200-301 — Jeremy's IT Lab 2025

Introduction to Cybersecurity — Harvard CS50 2024–2025

Linux Fundamentals — Hack The Box Academy 2024–2025
